

ABARTH WORLD.COM

THE FIRST CATALOGUE WITH
CAR CONFIGURATOR

#4 HERITAGE

Records and victories express the vision of Carlo Abarth: a brand that goes beyond passion for cars to become a true philosophy of life.

#6 RACING

From the brand's trofei to the Abarths designed for victory. Choose your challenge.

#10 HANDMADE

In the heart of the Officine Abarth, where passion and attention to detail beat every record.

#12 ABARTH 500

"Small and mean", as Abarth tradition has it.

#36 KIT ELABORAZIONE

What you need to transform your Abarth, in form and substance.

#40 COLLECTION

The merchandising collection for true fans.

#44 ABARTH WORLD

Join the community, for a full-immersion Abarth Experience.

**A WORLD OF PERFORMANCE
SINCE 1949**

A WORLD OF PERFORMANCE SINCE 1949

To understand who we are, we love to tell you where we come from. 15 November **1908:** Karl Abarth is born in Austria, and from that moment something changes forever in the world of racing. **1928:** Karl Abarth, as a humble mechanic in the Moto Thun stable, stands in for the injured driver and rides a motorbike in the qualifiers for the Austrian Motorcycle Grand Prix, getting the best time ahead of the best riders of the day no less than twice. Karl Abarth passes to the **sidecar**: on three wheels, **he challenges and beats the Orient Express** over the 1372 km between Ostend and Vienna, a feat which took him to the utmost levels of performance and fame. During the Second World War, Karl Abarth moves to **Italy**, acquiring citizenship in exchange for sporting success. **1949:** Karl founds ABARTH & CO. The **Carlo Abarth Squadra Corse** wins in all possible events under the symbol of Scorpio, Karl's zodiac sign. But the costs of racing are too high and, with the aim of limiting them, Abarth ingenuity gives birth to the **first modification kit** for the gearbox and tailpipes of the Fiat Topolino: an enormous success, since it allowed anyone to transform their Topolino into a faster, more exciting car. And thus the **Abarth philosophy** was born: democratising race cars, transforming the smallest into the meanest by tuning them to get the most out of all available horsepower. Year after year, record follows record, and great cars great cars: the 600 will become the racing machine known as the **750 Abarth**. 1959 sees the creation of the Fiat **500 Abarth**, and then there's a progressive burst of speed and power: the 595, the 595ss, the 695. Fifty years later, the challenge continues, fuelled by new experimentation and the passion of Abarth fans throughout history.

ABARTH

DRIVING ACADEMY

TO REALLY HAVE FUN AT THE WHEEL OF AN ABARTH, YOU NEED TO KNOW HOW TO CONTROL IT. THAT'S WHY THERE ARE ABARTH DRIVING ACADEMY COURSES CREATED WITH ANDREA DE ADAMICH'S INTERNATIONAL SAFE DRIVING CENTRE. THERE ARE COURSES FOR ALL TYPES OF DRIVER, AN EXCITING AND ENGAGING PROGRAMME WITH ABARTH CARS SO YOU CAN FULLY APPRECIATE THE PERFORMANCE AT THE WHEEL. WWW.GUIDASICURA.IT/ABARTH

<http://bit.ly/11KXm4M>

BORN TO RACE

RACING.ABARTH.COM

If your passion is for the track, Abarth will take care of giving you a hand.

Faithful to the "democratic" spirit of its founder, Abarth opens the track to all sports souls who want to try their hand at various levels. There are plenty of Abarth challenges available to you, but above all there's a network of exclusive centres for tuning your car for the purpose. They are the official "Abarth Assetto Corse"

centres, but also a network of highly specialised racing tuning centres, the only people who can install the performance kits while guaranteeing full compliance with environmental and safety legislation and taking care of type approval directly. Because Abarth opens the track to all, but only lets the few "get their hands" on it.

TROFEO ABARTH

Aspiring or professional driver or racing fan. Whoever you are, prepare to warm up your engines and experience great emotions on the most thrilling and demanding circuits in the entire world. www.troferoabarth500.com

<http://bit.ly/1n4WcJD>

#ABARTH500_RALLY_R3T

Type-approved for Group R3T, the category for turbocharged cars up to 1600 cm³ in capacity, it's ideal for private drivers and young people who want to show their worth in a true racing car, capable of outstanding performance by any standard. Equipped with special welded roll-bar, integral with the body, the required safety devices and FIA type-approved seats with seat belts with 6 anchorage points. In 2010 it lent its name to a promotional rally trofeo.

#ABARTH500_ASSETTO_CORSE

She's the great little heir of the legendary Abarth 595. The Abarth 500 Assetto Corse was designed for the world of racing: lightened for better pick-up, equipped for better performance.

On board there's a specific suspension setup, 17" racing light alloy wheels, aerodynamic profiles, type-approved racing roll-bar, racing seats and everything you need for racing.

With her, every finish promises to be memorable.

#ITALIAN_F4_CHAMPIONSHIP POWERED BY ABARTH

Abarth's experience is also racing in F4 with the new 160 HP 1.4 T-Jet engine. Fitted with a low-inertia turbocharger, it permits excellent performance even at low revs and records impressive values: 5500 rpm of maximum power and maximum torque of 240 Nm at 3500 rpm. A Formula that sets off with the right boost.

#ABARTH695_ASSETTO_CORSE_EVOLUZIONE

The new Abarth 695 "Assetto Corse Evoluzione" was born for the track. More powerful, lighter, offering improved performance. From the aggressive front decorated with the Abarth logo and broader bumper to the aerodynamic spoiler and screen-printed grilles, its great looks match its performance and driving becomes even more exhilarating.

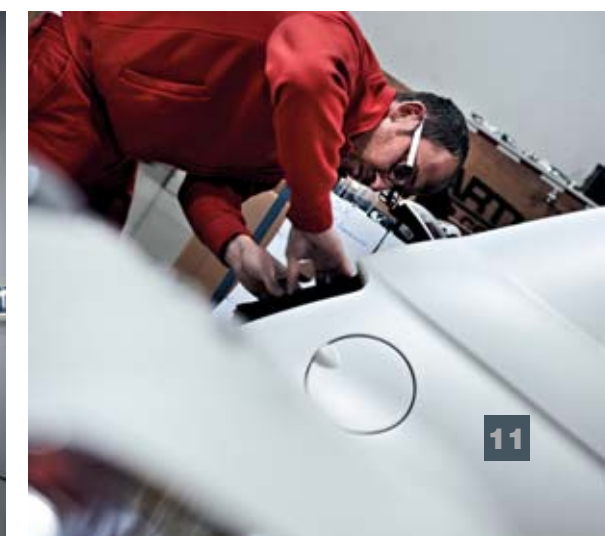

ABARTH HANDMADE

There's only one place where an Abarth can be created and get up and running: the Officine Abarth in Turin. A centre where everything has been scrupulously designed, chosen and created to identify the values of the brand and transfer them, step by step, to Abarth's new creations.

Inside the Officine Abarth, it only takes a glance to see that you're dealing with a special place. The grey resin flooring recalls the asphalt of race tracks. Light and space everywhere, plus the Abarth colours, white, red and grey. An impeccable area with a heady atmosphere of technology and organisation, where the people too make the difference: specialist professionals, driven by Abarth passion, fully rounded mechanics who follow every stage of the car creation process personally.

It is precisely their craft that adds value to the product, and so much so that the operating methods of this plant are far removed from the logic of mass production to enter into a decidedly more handmade dimension. Every Abarth goes through the various stages of production accompanied by specific technicians: bodyshop, engine, interior, assembly, checks, graphics. Only at this point can an Abarth leave the Officine, for the first test on the circuit. Proud to exist.

RANGE #ABARTH2014

PERFORMANCE IS FELT AND SEEN.

One of the new features offered as standard on the entire MY 2014 range is the new instrument panel with 7" digital display and TFT (Thin-Film-Transistor) technology. A multipurpose backlit colour display that all Abarth enthusiasts will like. It has two display modes: "normal" that gives handy information like fuel consumption and headlight alignment; "sport" that displays specific performance data, such as the longitudinal/lateral accelerometer (G-meter information) which takes gravitational acceleration (g) as its unit of measurement.

YOUR ABARTH, YOUR COLOUR.

A wide selection of new body colours is available for the Model Year 2014 range:

6 pastel, 3 metallic, 2 tri-coat, including the super sporty Cordolo Red, and 6 bi-colour. So you can choose your Abarth in complete freedom, and above all in line with your style.

Range#Abarth2014

HATCHBACK. FOR THOSE WITH THEIR HEAD IN THE CURVES.

Compact, aggressive, powerful. For those who want sheer Abarth.

WHERE PASSION BEGINS

ABARTH **500**
